QUARTERLY NEWSLETTER
WINTER 2019-2020

**NEXUS DEALER SERVICES &
SHIELD PRODUCES SIGNIFICANT
RETURN ON CAPITAL TO OUR
DEALER PARTNERS**

Earlier this year, Nexus Dealer Services dug into the performance of two of their Southern California dealer partners. As an approved Dealer for Shield, the two dealerships earned significant monthly revenue increases over the last 6 months, topping any other hardware based accessory sold. Shield eliminates up-front dealership costs and labor with its hassle-free features including no pre-load/installation, all-inclusive pricing, and no contracts. We are proud to offer a revenue driving product to our partner Nexus and their Dealers.

IN THIS ISSUE:

1. Discover how Asset Tracking By Shield is positioned to revolutionize inventory management.
2. Shield's versatile features enable multiple unique recoveries.
3. M2M coordinates with the Los Angeles County TRAP team in vehicle recovery.

ASSET TRACKING by SHIELD

Asset Tracking by Shield is designed to track and locate any asset regardless of power source. With the magnetic design, attach the device to any magnetic surface for easy install. Most importantly, Asset Tracking by Shield is easy to use. The device comes charged and active. Simply place the device on the asset you want to track, register it on our website and go. With our three product variations, you're guaranteed to find the right solution for your business.

ASSET TRACKING LITE by SHIELD	ASSET TRACKING by SHIELD	ASSET TRACKING PLUS by SHIELD
1 Year Battery Life	2 Year Battery Life	3 Year Battery Life
Reports Every 6 Hours	Reports Every 12 Hours	Reports Every 24 Hours

SUCCESS STORIES

Take a look how Shield's versatile features & benefits have made three unique recoveries possible.

Shield's **superior GPS** and indoor tracking features enabled the recovery of a stolen powersports vehicle placed in a van.

Authorities used Shield's **indoor positioning technology** to help locate a fraudulently purchased vehicle placed in an otherwise restricted area: a garage.

As a **self-powered device**, Shield was uniquely able to recover a trailer in Kansas City, which lacks access to a power source.

TESTIMONIAL

Shield is the first device with indoor positioning technology capabilities in the Stolen Vehicle Recovery and Asset Tracking markets. Shield's indoor positioning technology feature was critical in recovering a stolen vehicle for our partner Nexus in Southern California because it enabled the device to provide location information in an otherwise restricted environment, the garage.

"TRAP couldn't have been able to locate the fraudulently purchased vehicle as quickly as we did without the assistance of David Sailors and his continuous monitoring of the vehicle. The location where the vehicle was located by M2M Technologies was not on our radar, so therefore we could not have been able to locate the vehicle without David and M2M Technologies."

-Detective Salvador Diaz, Los Angeles County Taskforce for Regional Autotheft Prevention (TRAP)

WE'RE INVESTING IN OUR PEOPLE AND TECHNOLOGY

This winter, we welcomed a new software engineer to improve the back-end design and functionality of our tracking system, Atrax. We're excited to bring site improvements to support our growth in 2020.
